

REMARKS

This Amendment is being filed with a Request for Continued Examination. Entry of the Amendment is therefore requested before examination of the application by the Examiner. As amended, the claims are directed to controlling a source that is external to a system, which provides the browser instance. More specifically, the claim recites controlling the external source based on user interaction with a user interface of the browser instance. For at least the reason that the cited prior art fails to teach or suggest such an arrangement, Applicant respectfully requests allowance of the application. Newly-added claims 33-34 are patentable for at least the same reason as independent claim 20. The Commissioner is authorized to charge any additional fees or credit any overpayment to Deposit Account No. 20-1504 (ITL.0215US).

Respectfully submitted,

Date: December 22, 2006
